

New homeopathic hCG SuperBlend™ formula Overview

(THIS IS THE MOST COMPREHENSIVE HOMEOPATHIC FORMULA ON THE MARKET TODAY)

ACTIVE Ingredients: Glandulars, Hormones and Neurotransmitters (Official HPUS) Equal volumes of each ingredient in 10X, 30X, LM1 potency.

ACTH – (Adrenocorticotrophic Hormone) - stimulates the adrenal glands to produce cortisol and other hormones which regulate growth and physical development.

Adrenalinum - Also called epinephrine, regulates appetite and satiety as a neurotransmitter in the brain. As a circulating hormone acts as a ‘fat-burner’ by stimulating lipolysis in adipose tissue (metabolic breakdown of fat in fat-storing tissue). A known stimulant that increases pulse rate and blood flow, increases muscular strength and endurance, and promotes an invigorated state of mind. For relief of increased appetite, apathy and lack of ambition, loss of strength, general marked anemia, and belching after meals.

Cortisone - A hormone released by the adrenal gland in response to stress. Belongs to the glucocorticoid steroid group responsible for fat, protein, calcium, and carbohydrate metabolism. Indicated for fat and water retention, dysthyroidism with tendency to hypothyroidism, and rhythmic disorders of several glands: pituitary, adrenal, pancreas. For individuals with a tendency to obesity with retention of water, dry skin and mucous membranes, acne of the face, shoulders, and back, diminished sexual desire, and/or restless legs.

Hypothalamus - Whole glandular containing hormones which regulate water retention and the release of hormones from the pituitary gland. Indicated for the oversensitive individual with depression linked to stress or physical issues, easily discouraged, indecisive, and intellectually fatigued. This remedy is effective in issues of thyroid malfunction, water retention, and obesity. Also indicated for disturbances of the appetite and circulatory malfunction.

Pituitarum - Anterior and posterior pituitary gland containing hormones involved in appetite and weight control as well as regulation of thyroid hormone release. Stimulates muscular activity, regulates reabsorption of water at the kidneys, treats atrophy of the breasts, alleviates gallbladder inflammation (often linked with obesity). Effective in the relief of back and neck ache, night time anxiety, difficult mental concentration and obsessive thoughts.

Thyroidinum - Whole glandular preparation containing hormones of the thyroid, which act to increase the metabolic rate, enhance oxygen delivery, and increase the body's sensitivity to catecholamines (such as the ‘fat-burning’ hormones norepinephrine and epinephrine). Indicated for excessive obesity. Thyroidinum provides a general regulation of carbohydrate, protein, and fat metabolism through its influence over the organs of nutrition, growth, and development. Effective relief for metabolic disorders, muscular weakness and sugar cravings.

Botanicals and Elemental Compounds: (Official HPUS)

Anacardium Orientale - A great remedy for relief of that empty feeling in the stomach and for nervous stomachs which are relieved by food. For people when eating temporarily relieves all discomforts. For weak digestion with fullness and distention. Bowels inactive. For impaired memory, depression and irritability. For weakening of all senses, sight, hearing etc. Aversion to work, lacks self-confidence.

Antimonium Crudum - A specific remedy for mental symptoms and those of the gastric sphere. Constitutional tendency to grow fat and digestive disturbances. Helpful when whatever you do fails to give satisfaction. Sulky and peevish. Excessive irritability and fretfulness. Continual drowsiness in elderly people. Cracks in corners of mouth. Much concerned about his/her fate. Sentimental mood.

Calcarea Carbonica - An excellent constitutional remedy for tendency to grow fat. For large bellies and flabby fat metabolisms. Craves eggs, salt, sweets, eat dirt, chalk, coal, pencils and other indigestible things. Aversion to meat, boiled things. For aversions to work or exertion. Cramps in stomach. Cannot bear tight clothing, swollen abdomen. Forgetful, confused and low-spirited. Anxiety with palpitation. Persistent sour taste.

Fucus Vesiculosus - A powerful, specific remedy for obesity and non-toxic goiter. Aids digestion. For treating thyroid enlargement in obese subjects. Contains high concentrations of iodine, essential in the synthesis of thyroid hormones.

Kali Bichromicum - Especially indicated for fleshy and overweight. Feels as if digestion had stopped. Cannot digest meat. Relieves cutting pain in abdomen. For relief of chronic intestinal ulceration. Relieves soreness in right side. Dislikes water.

Oleander - Bulimy, with tremor of hands, from eager craving for food, often with absence of appetite.

Sabadilla - For relief of canine-like appetite for sweets and starches.

Staphysagria - Decreases desire for stimulants. Relieves canine-like hunger even when stomach is full.

Tanacetum Vulgare - Assist in dealing with sluggishness, lethargy.

Other Ingredients: Equal volumes of each ingredient in 10X, 30X, LM1 potency.

Agrimonia - Using food as a way of escaping or masking real feelings.

Castanea – Eating out of habit to break counterproductive patterns of eating

Oenothera Hookeri – Prone to overeating, tendency to have an expanded stomach as though pregnant; seldom feeling full or nourished by food even when large amounts are eaten.

Calochottus Leichtlinii - Lack of feeling nurtured as a child, overeating or denying food as a result; using food as an emotional crutch or “mother” substitute.

Achillea Millefolium - Using food as a buffer for emotional oversensitivity; stuffing oneself to “dull out” or numb feelings.

Amino Acid Complex (L-Arginine, L-Ornithine, L-Carnitine) 3X, 6X, 12X, 30X;

Human Chorionic Gonadotropin (hCG) 6X, 12X, 30X, 60X.
